MAIN PROGRAM WATER SUPPLY REGULATION AND OPERATIONS
PROGRAM PORT MORESBY SEWERAGE

Program Objectives:

To upgrade and improve the sewerage system of Port Moresby and to reduce environmental pollution.

Program Description:

Adequate sewerage system is vital to urban development and expansion. The program intends to improve the sewerage system of Port Moresby City to accommodate a growing population and minimise pollution on the marine life. The program will upgrade, rehabilitate, construct the sewerage infrastructure network and will also treat sewerage discharges.
