

MID YEAR ECONOMIC AND FISCAL OUTLOOK REPORT

2010

INTRODUCTION

The Mid Year Economic and Fiscal Outlook Report (MYEFO) is released in accordance with the requirements of Sections 9 and 15 of the *Papua New Guinea Fiscal Responsibility Act 2006*.

The purpose of the MYEFO Report is to provide updated fiscal information (especially for the current financial year) to allow the Parliament and the public to assess developments against that set out in the 2010 Budget.

The MYEFO contains the following:

- Part 1: The Mid Year Economic and Fiscal Outlook
 - 1.1 The Economic Outlook
 - 1.2 The Fiscal Outlook
 - 1.3 Revenue
 - 1.4 Expenditure and Net Lending
 - 1.5 Status of Trust Accounts
 - 1.6 Financing
 - 1.7 Public Debt
 - 1.8 Risks to the Mid Year Economic and Fiscal Outlook
 - 1.9 2010 and Beyond
 - 1.10 Fiscal Outturn Tables

- Part 2: Mid Year Expenditure Estimates by Agency
 - 2.1 Funded Expenditure Decisions since the 2010 Budget
 - 2.2 2010 Budget Execution
 - 2.3 Reallocation of Appropriated Funds

- Part 3: Appendices

The MYEFO essentially covers central government fiscal operations in what is known as the Government sector. Consistent with the 1986 Government Finance Statistics (GFS) cash reporting framework, the Government sector is defined as covering all units performing government functions, that is, the implementation of public policy through the provision of primarily non-commercial services and the transfer of income, supported mainly by compulsory levies on other institutional sectors.

Government owned or controlled units, which sell industrial or commercial goods and services to the public on a large scale, are excluded from the government sector and are classified separately as non-financial public enterprises. Government owned and or controlled financial institutions are also classified separately from the Government sector as public financial institutions.

The financial information presented in this report is based on the same reporting standards as the 2010 Budget. Generally, this follows the cash reporting standards originally laid down in the 1986 'Manual of Government Finance Statistics' published by the International Monetary Fund.

PART 1

THE MID YEAR ECONOMIC AND FISCAL OUTLOOK

1.1 THE ECONOMIC OUTLOOK

Overview

Gross Domestic Product (GDP) is expected to grow very strongly in 2010, with the commencement of the Papua New Guinea (PNG) Liquefied Natural Gas (LNG) and other mining related projects and a rebound in a number of sectors following softer conditions in 2009. Economic output is estimated to have expanded for nine successive years, representing the longest period of uninterrupted economic growth in PNG. The solid performance of the economy reflects increased investor and consumer confidence following a period of political and macroeconomic stability and the success of microeconomic reforms undertaken by the Government.

Recent economic data suggest that the recovery in the global economy has evolved better than previously expected with economic growth rebounding from the 2009 global recession. As a result, general confidence has picked up among consumer and business and in international financial markets, with equity and commodity prices recovering from the lows of 2009. However, the pace of the global economic recovery has been uneven with sluggish economic growth experienced in advanced economies compared to vigorous growth expected in most emerging and developing countries. In addition, sovereign debt concerns in Greece and some other European countries combined with some mixed signals on the state of recovery in the US economy more recently has seen concerns about the strength of the global recovery increase. This led to further weakness in financial and commodity markets.

Since the time of the 2010 Budget, risks associated with the PNG LNG project have declined with the confirmation of the project proceeding to its first phase of construction. Nevertheless, there are number of other risks that may result in changes to the economic and fiscal outlook presented in this update. These include the rising uncertainty in the global economic recovery, which could lead to volatility in global trade (including PNG's exports) and commodity price movements, loss of fiscal discipline and disruptions to mining and petroleum projects. In addition, a recent court decision concerning the Organic Law on the integrity of political parties could see business confidence wane if the domestic political situation becomes more uncertain.

The Outlook for the International Economy

The International Monetary Fund (IMF) anticipates that the global recovery will be stronger than previously projected. The world economy is now expected to grow by 4½ per cent in 2010, revised up by ½ a percentage point from the IMF's April 2010 economic outlook. In the advanced economies, growth is expected to remain sluggish by past standards, whereas in many emerging and developing economies, economic activities are anticipated to be relatively vigorous, largely driven by buoyant internal demand.

In 2011, world growth is expected to be 4.3 per cent. In spite of the revision, the recovery in advanced economies is still expected to be weak by historical standards, with real output remaining below its pre-crisis level until late 2011.

Chart 1: World Economic Growth

Source: International Monetary Fund, World Economic Outlook (June 2010)

Growth in advanced economies is forecast to be 2.6 per cent in 2010, easing to 2.4 per cent in 2011. The upward revision to the economic growth of advanced economies is largely driven by stronger economic growth projections in the United States, Canada and other advanced economies. However, recent economic data suggest that the rapid pace of the economic recovery is slowing with a number of countries gradually withdrawing the large monetary and fiscal stimulus implemented after the global financial crisis. Economic growth in Europe remains broadly unchanged and sluggish. Downside risk to economic growth in Europe has heightened with the potential for sovereign debt problems in the financial markets spilling over into real economic activity.

Growth in emerging and developing economies is expected to increase to around 6.8 per cent in 2010, following a modest 2.5 per cent increase in 2009. Driving this buoyant economic growth is stronger economic activity in China, India, Brazil and other Asian economies. Factors that have supported Asia’s rapid recovery and resilient economic growth include the rapid normalisation of trade following the financial dislocation in late 2008, which has greatly benefited the export-orientated economies in the region; the resumption of capital inflows into the region and finally resilient domestic demand in both private and public components. Weighing down this grouping is sluggish growth in Central and Eastern Europe. Output in emerging and developing economies is projected to moderate to 6.4 per cent in 2011.

Global inflationary pressures are expected to remain subdued in most advanced economies. This is mostly attributed to low levels of capital utilization following the global recession and well-anchored inflation expectations. In the advanced economies, headline inflation is expected to pick up from near zero in 2009 to 1.4 per cent in 2010, as energy prices have begun to rebound. In the emerging and developing economies, inflation is expected to increase to 6.3 per cent in 2010, as some of the economies are faced with growing pressures due to increased capital flows and strong economic growth with little excess productive capacity.

Commodity Prices

Following large falls to commodity price in late 2008 and early 2009; commodity prices began to rebound in the second quarter of 2009 and into the early parts of 2010, supported by the strengthening global economy. In particular, China increased its demand for commodities and economic data from the United States in very early 2010 indicated that the recovery there was stronger than earlier anticipated. Significant production cuts also contributed to higher metal and oil prices. As a result, the higher kina price of most of the mineral and agricultural commodities resulted in the weighted average price of PNG's exports increasing by around 40 per cent in the March quarter of 2010, compared to the corresponding quarter of 2009.

Chart 2: IMF Commodity Price Index

Chart 3: Oil Price

Source: IMF and Eco Reuters

Following the onset of the Euro debt crisis over recent months, industrial commodity prices fell sharply in May 2010 due to concerns about economic growth and weakening commodity demand. Oil prices dropped from a high of US\$87 per barrel to US\$68 per barrel during May, and some metals prices fell more than 20 per cent from their highs in April. The declines occurred amid recovering global demand, particularly outside of China, which had provided much of the initial demand strength during the recovery. Agricultural prices have experienced less of an impact during the Europe debt crisis. However, commodity price have recently become more volatile as financial markets have become more concerned with a slowdown in economic activity in the United States and China.

Agricultural prices have also rebounded from lows in late 2008 and early 2009, but less strongly than energy and metal prices. The situation in Europe has also had less of an impact on agricultural prices relative to energy and metals prices. On average, over the first half of 2010,

coffee prices averaged around US\$209 per tonne, cocoa prices have average around US\$3,252 per tonne, coconut oil prices have averaged US\$895 per tonne and palm oil prices have averaged US\$772 per tonne. With overall agriculture prices better than 2009 levels, higher agriculture activity is expected in 2010.

Compared to the 2010 Budget, PNG’s major mineral export prices of oil, copper and gold have all traded higher than expected in the first half 2010. Oil prices have averaged around \$US78 per barrel, above the Budget assumption of US\$67 per barrel. Copper prices have averaged around US\$7,143 per tonne, above the Budget assumption of US\$5,200 per tonne. Gold prices have averaged around US\$1,154 per ounce, above the Budget assumption of US\$860 per ounce. With overall commodity prices better than expected at Budget, mineral and petroleum price assumptions (see Table1) and taxes have been revised up in 2010.

The Outlook for the Domestic Economy

The PNG economy was able to navigate the negative impact of the global financial crisis in 2009 better than expected. Business activity, especially in the construction and communication sectors of the economy showed little signs of a slowdown. Businesses in these sectors pressed on with projects in order to take advantage of the increased economic opportunities offered in PNG following two very strong years of economic growth in 2007 and 2008 and with the expectation of the PNG LNG project commencing. The financial sector has also been resilient to the problems faced overseas, due to a strong domestic funding base, relatively low exposure to troubled international instruments and well managed balance sheets. This allowed the sector to continue its important role of supporting economic growth through financial intermediation to the private sector.

The PNG economy is expected to rebound and grow very strongly in 2010 after a slight moderation in growth in 2009. The economy is expected to grow at 7.5 per cent in 2010, one percentage point lower than the budget forecast of 8.5 per cent. This slight downward revision mainly reflects lower than expected production from the Ramu NiCo mine in 2010, with the first year of mine production anticipated to take place at a more moderate rate than initially

anticipated. In addition, the pace of economic activity has not been as strong as previously expected in the first half of the year as indicated by weaker employment growth.

The downgrade in production from Ramu NiCo in 2010 has greatly affected the growth projection for the mining and quarrying sector. The sector is now expected to grow by 11.0 per cent in 2010, down from a very strong 23.0 per cent projected in the 2010 Budget. This reduction in expected growth also includes minor downgrades in production from other major mines to reflect lower ore grades among other issues.

Non-mining GDP growth in 2010 is expected to be strong at 7.6 per cent, although lower than the budget estimate of 8.1 percent. The growth in non-mining output is expected to be largely driven by the direct and indirect benefits flowing on from the commencement of the PNG LNG project. This forecast also includes the expected rebound in the agriculture, forestry and fisheries sector and the manufacturing sector, as the global economy continues to recover in 2010.

Chart 6: Economic Growth: 1996 – 2010

Source: Department of Treasury

The agriculture, forestry and fisheries sector is expected to rebound in 2010 to grow by 3.6 per cent, with the return to more normal levels of production expected from coffee, cocoa and copra after a depressed 2009. It appears that the coffee bi-annual season returned in 2009, with 2010 expected to be a good year for growers. In addition, the containment exercises for the cocoa pod borer undertaken in 2009 is expected to assist to sustain cocoa production in 2010, while the return of better global demand and prices in 2010 is expected to provide more incentive for all cash crops, especially copra producers.

The transport, storage and communication sector is expected to continue its exceptional pace of growth in 2010. Competition and expansion in the mobile phone industry is expected to continue to deliver more benefits to businesses and consumers, with an improved range of products and wider network coverage. Expansion programs continue through the roll-out of more site towers across the country. As a result, the forecast for this sector has been increased to 16.5 per cent in 2010, up slightly from 14.8 per cent estimated at budget time. At the same time, the transport and storage industry is also expected to be a major beneficiary from the increased level of activity generated by the PNG LNG project, which is expected to ramp up over the remainder of 2010.

The strong activity witnessed in the construction sector over the past couple of years has been one of the major highlights of economic activity in PNG. In 2010, this trend is expected to continue with the direct benefits of the PNG LNG project expected to provide an additional boost to activity. Aside from the main PNG LNG project construction, a wave of construction activity has swept the economy, largely generated by the additional needs of the PNG LNG project and other businesses for office space and accommodation. A number of these projects undertaken over the past few years within Port Moresby are now entering final stages of work or have been completed - these include the Vision City in Waigani, ANZ Haus and the Solwara Apartments located at the harbour side. Despite this, the expected growth rate of 14.0 per cent in 2010 is only slightly lower than in 2009. This reflects capacity constraints in the industry as well as moderation in the number of developments following the strong expansion in recent years.

Growth in other non-mineral sectors such as wholesale and retail trade, electricity, gas and water and manufacturing are expected to see a boost in growth in 2010, with stronger aggregate demand flowing from a return of export demand after the global recession in 2009 and benefits arising from the PNG LNG project.

Finance, real estate and personal services is expected to grow strongly in 2010, although a little lower than 2009. Lending activity is expected to remain solid due to the commencement of the PNG LNG project. However, residential and commercial lending is expected to moderate, as financial institutions have significantly increased their exposure to the real estate market in the past few years. On the upside, the rapid progression and understanding of technology in the community could see a significant uptake in the mobile banking concept. This could provide a significant boost to finance activity in the future. Real estate activity is also expected to remain buoyant with the strong influx of people entering PNG.

Table 1: Economic Forecasts

	2009 ACTUAL	2010 BUDGET	2010 MYEFO
Economic Growth (%)			
GDP (est)	5.5	8.5	7.5
Non-Mining GDP (est)	6.3	8.1	7.6
Inflation (%)			
Year average	7.0	9.5	7.0
Interest Rate (%)			
T/Bills	8.0	8.0	7.0
3 year I/S	8.2	8.2	7.2
Mineral Prices			
Gold (US\$/oz)	973	860	1100
Copper (US\$/lb)	5,100	5,200	6,500
Oil (Kutubu: US\$/bbl)	62	67	72

Source: Department of Treasury

The moderation in employment growth is another indicator that the pace of economic activity in the first half of the year has not been as strong as previously expected. In the March quarter 2010, total non-mining employment fell by 1.3 per cent to be 1.3 per cent higher compared to a year ago (see Chart 7). This represents a considerable moderation in employment growth compared to the previous quarter, where annual employment growth was around 5.0 per cent. The fall in quarterly employment was largely driven by lower employment in the manufacturing and retail sectors.

Chart 7: Total Non-Mining Employment Growth

Source: Bank of PNG Employment Index, Quarterly Economic Bulletin, March 2010

Inflation

In 2009, headline inflation eased to 7.0 per cent in year average terms (from 10.6 per cent in 2008) and had moderated to be 5.7 per cent higher in the year to the December quarter 2009. This was consistent with declining international price pressures and some moderation in economic growth.

Underlying inflation has exhibited a similar trend, easing from a peak of 12.2 per cent through the year to September quarter 2008 to be 5.2 per cent through the year to December quarter 2009.

Chart 8: Headline and Underlying Inflation

Source: National Statistical Office/Department of Treasury

The moderation in inflation continued into the early part of 2010 when inflation rose by 1.4 per cent in the March quarter to be 5.0 per cent higher than a year earlier. The moderation in inflation partly reflects the reduction and subsidization of school fees in the beginning of the year coupled with the falls in international food and energy prices following the global financial crisis.

Chart 9: Food Price

Chart 10: Oil Price

Source: International Monetary Fund

The moderation in international food and energy prices has resulted in tradable inflation falling from 9.7 per cent through the year to the March quarter 2009 to 2.5 per cent through the year to the March quarter 2010. However, Chart 9 and 10 shows that prices have recovered somewhat since the second half of 2009.

Although tradable inflation has eased considerably, non-tradable inflationary pressures persist (i.e. domestically generated inflation), declining slightly from a high of 10.6 per cent through the year to the March quarter 2009 to 7.8 per cent through the year to the March quarter 2010. Non-tradable inflation is anticipated to accelerate over the coming period with pressures on economic resources generated by the PNG LNG project.

Chart 11: Exchange rate developments

Chart 12: Tradable and Non-tradable inflation

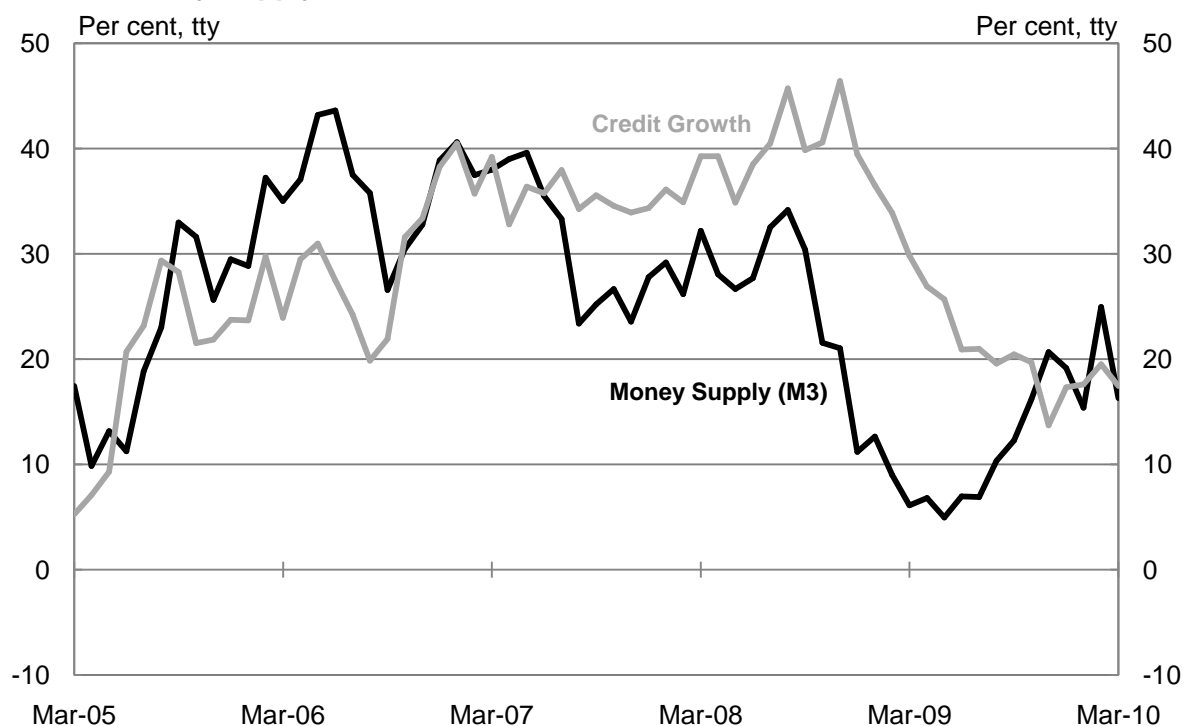

Source: Bank of PNG Quarterly Economic Bulletin, March 2010 and Department of Treasury

Another factor that has helped in the moderation to inflation has been the Bank of PNG's actions in reducing the growth rate of liquidity in the economy. As shown in the following charts, money supply growth eased considerably in late 2008, to help curb the strong ramp up in prices over that period.

At the same time, private sector credit growth has also eased with a significant slowdown in credit growth since the beginning of 2009, falling from very strong growth of 42.0 per cent through the year to December quarter 2008 to around 16.9 per cent in the corresponding quarter of 2009. In March 2010, private sector credit growth fell by 0.1 per cent, largely reflecting a write-off of a loan to the Cocoa Board, but remained 17.4 per cent higher than a year earlier.

Chart 13: Money Supply and Credit Growth

Source: Bank of PNG Quarterly Economic Bulletin, March 2010 and Department of Treasury

Although the recent trend in the inflation figures point to a moderation in inflationary pressures, annual inflation remains significantly above those levels recorded in the years prior to 2008. While the strong international cost pressures experienced in 2008 were picked up in the official statistics, primarily through higher food and fuel prices, there is a concern that current domestic inflationary pressures are being understated in the official statistics produced by the National Statistical Office. For example, there are a number of domestic expenditure items such as the price of dwelling rentals which are reported to have been unchanged for the past two decades. This is despite the enormous increase in dwelling rents that have been observed over the past few years, which highlights inadequacies in the official statistics. Based on business liaison visits, anecdotal evidence suggests that inflation has been running at closer to 8.0 to 10.0 per cent in the past year, with a number of businesses factoring these figures into their negotiations rather than using the official figures.

Inflation is estimated to average around 7.0 per cent in 2010. This represents a downward revision to the Budget forecast of 9.5 per cent, largely owing to the weaker than anticipated March quarter 2010 inflation outcome and the lower economic growth forecast in 2010. The forecast projects a pickup in inflation over the remaining quarters in 2010 due to the following factors:

- Strong domestic demand associated with a ramp up in LNG related construction activity.
- High government expenditure and the impact of the fast drawdown of trust account funds in 2009.
- Growth in the monetary aggregates is showing signs of trending up again, and this could continue with the ramp up in the LNG project.
- International factors could also lead to higher tradable inflation. The recovery in the global economy could see high international food and energy prices, which were a core driver of very high inflation in 2008.

Looking ahead to 2011, inflation is projected to be 8.0 per cent compared to the budget estimate of 7.5 per cent. This reflects the factors discussed above and the higher level of economic activity associated with the ramp up in PNG LNG project investment spending.

Balance of Payments

A very large current account deficit was expected in 2010 at the time of the 2010 Budget, largely driven by the increase in imports associated with the construction phase of the PNG LNG project and other general imports in line with stronger economic activity. The income balance was also expected to be in deficit arising from the servicing of higher external liabilities.

In the March quarter of 2010 the current account showed a deficit of K837 million, with a deficit recorded in the trade, income and transfer balance. The trade balance contributed K473 million to the overall deficit, up from the trade deficit of K156 million recorded in the December quarter 2009. The rise in the trade deficit was largely due to a significant increase in service imports and lower exports, which have more than offset the decline in the import of goods. The income deficit was K288 million in the March quarter 2010. This is significantly lower than the deficit of K784 million recorded in the previous quarter, as a large dividend payment was made to overseas shareholders in that quarter. The transfer balance recorded a deficit of K76 million in the March quarter 2010, this compares to a surplus of K188 million in the previous quarter. In the coming quarters, the current account deficit is expected to increase substantially with higher goods and services imports due to the ramp up in PNG LNG project construction activity.

The medium term outlook is for the current account to remain in a high deficit position in line with higher imports associated with the construction phase of the PNG LNG project and capital expenditure by the mining sector. The current account deficit is expected to decline from 2011 onwards as LNG construction spending winds down. The current account is projected to move into surplus as full LNG production begins in 2015.

Chart 14: Balance of Payment

Source: Bank of PNG

International reserves were US\$2,457.4 million at end of December 2009 and decreased by 3.5 per cent to US\$2,372.0 million at the end of March quarter 2010.

Chart 15: International Reserves

Source: Bank of PNG (a) Includes reserve levels up to March 2010

1.2 THE FISCAL OUTLOOK

The fiscal position for 2010 is expected to be a surplus of K533.3 million compared to the projection of a balanced budget in the 2010 Budget. This is attributable to higher than expected revenue receipts, particularly mineral revenue, partially offset by higher than anticipated expenditure on personnel emoluments. The use of this surplus to fund a number of outstanding Government expenditure pressures will be outlined in the upcoming Supplementary Budget.

The updated fiscal estimates for 2010 are set out in the table below. These estimates are made on the basis of no policy changes. For example, these figures do not include any spending initiatives from the LNG Benefit Sharing Agreement apart from those outlined in the 2010 Budget.

Table 2: Budget Balance 2009-2010 (Kina Millions)

	2009 Actual	2010 Budget	2010 MYEFO
Total Revenue and Grants	6,651.3	7,489.7	8,159.5
Total Expenditure and Net Lending	6,687.5	7,489.7	7,626.3
Deficit(-)/Surplus (+)	-36.2	0.0	533.3
% of GDP	-0.2%	0.0%	2.1%

Source: Department of Treasury

Table 3 provides a reconciliation of the MYEFO budget balance estimates with those at the 2010 Budget, showing the effect of policy decisions and parameter and other variations.

Table 3: Reconciliation of Budget Balance 2010 (Kina Millions)

	2010
2010 Budget Balance	0.0
% of GDP	0.0
Changes between 2010 Budget and MYEFO	
Effect of policy decisions (a)	
Revenue	0.0
Expenditure	-36.5
Total policy decisions	0.0
Effect of forecast and other variations	
Revenue	669.8
Expenditure	-100.0
Total forecast and other variations	569.8
2010 MYEFO Budget Balance	533.3
% of GDP	2.1

(a) Excluding the public debt net interest effect of policy measures

Source: Department of Treasury

There was a policy decision since the 2010 Budget to use the K36.5 million dividend from the Independent Public Business Corporation (IPBC) for Business Development Grants. The main changes to the forecast and other variations since the Budget that have impacted on revenue are:

- Higher mineral and petroleum tax payments due to higher mineral prices;
- Higher company revenues due to higher profitability; and
- Higher international taxes due to higher collections to date.

The main variations since the 2010 Budget that have impacted on expenditure are:

- High personnel emoluments expenditure, partially offset by
- Lower interest payments due to lower interest rates.

1.3 REVENUE

Total Revenue and Grants for 2010 are estimated at K8,159.5 million, which is K669.8 million higher than the 2010 Budget estimate. This primarily reflects an upward revision to Tax Revenue of K644.2 million and upward revision to Non-Tax Revenue of K25.6 million. The variations to the Tax Revenue and the Non-Tax Revenue estimates are discussed below.

Table 4: Tax Revenue 2009-2010 (Kina Millions)

	2009 Actual	2010 Budget	2010 MYEFO
Tax on Income & Profits	3,519.7	4,029.7	4,657.3
Domestic Taxes on Goods & Services	1,063.2	1,258.9	1,226.7
Taxes on International Trade	391.6	446.7	495.4
Tax Revenue	4,974.5	5,735.3	6,379.5

Source: Department of Treasury

Tax revenues in 2010 have been revised up by K644.2 million since the 2010 Budget to K6,379.5 million. This reflects higher Tax on Income and Profits, partly offset by lower taxes on Domestic Taxes on Goods and Services. In the first five months of 2010, tax revenue collections were K2,326.7 million, or around 16 per cent above the year-to-date budget estimate for 2010.

The major factor behind the upward revision to the Tax on Income and Profits is the K503.3 million upward revisions in Company Tax¹ and Mining and Petroleum Tax, reflecting higher than expected collections and stronger commodity prices. In the first five months of 2010, K90.8 million of Dividend Withholding Tax has been collected, around 89 per cent above the year-to-date budget estimate for 2010.

Mining and Petroleum Tax is estimated to be K779.6 million higher compared to 2009. In the first five months of 2010, Mining and Petroleum Tax collections totaled K482.6 million, around 68 per cent above the year-to-date budget estimate for 2010 due to rebound in commodity prices in the first quarter of 2010.

Domestic taxes on goods and services in 2010 have been revised down slightly by K32.2 million to K1,226.7 million, due to lower estimated transfer of GST revenue to Waigani Public Accounts as a result of higher than expected level of GST refunds. In the first five months of 2010, collections were K462.6 million, 5 per cent below the year-to-date budget estimate.

¹ Refer to Fiscal Outturn Tables on page 25

Taxes on International Trade have been revised up by K48.7 million to K495.4 million in 2010. This reflects an upward revision to excise on imports, export duty and import duty with increased collections to date. In the first five months of 2010, collections of Taxes on International Trade were K228.3 million, around 71 per cent above the year-to-date budget estimate.

Table 5: Non-tax Revenue 2009-2010 (Kina Millions)

	2009 Actual	2010 Budget	2010 MYEFO
Property Income	138.0	285.2	313.8
<i>Non Mining Dividends</i>	0.0	55.0	38.5
<i>Mining & Pet. Dividends</i>	138.0	230.2	275.3
Interest & Fees from Lending	6.9	9.0	4.0
Other Non Tax Revenue	99.9	106.3	108.3
Injections from Trust Accounts	521.0	0.0	0.0
Total	765.8	400.5	426.2

Source: Department of Treasury

Non-tax revenue collections are projected to be higher than the 2010 Budget estimate by K25.6 million.

This largely reflects higher Property Income, comprised of Non-Mining Dividends and Mining and Petroleum Dividends. Mining and Petroleum dividends are expected to be K45.1 million higher than Budget forecasts, due mainly to higher copper and gold prices. This offsets lower Non-Mining Dividend receipts, which have been revised down by K16.5 million since the 2010 Budget due to lower than anticipated dividend payments, especially from the Bank of PNG.

There were no injections from Trust Accounts recorded in the 2010 Budget.

The final components of Total Revenue and Grants (after Tax Revenue and Non-Tax Revenue) are Project Grants and Infrastructure Tax Credits (ITC). ITC's are expected to be K60.0 million in 2010, the same as appropriated at Budget and Project Grants are expected to be K1,293.9 million, the same as appropriated at Budget time.

1.4 EXPENDITURE AND NET LENDING

Total expenditure and net lending in 2010 is estimated to be K7,626.3 million, which is K136.6 million higher than the 2010 Budget estimate. This comprises an upward revision to the Recurrent Budget of K100.0 million and an upward revision to the Development Budget of K36.5 million.

Table 6: Total Expenditure and Net Lending 2009-2010 (Kina Millions)

	2009 Actual	2010 Budget	2010 MYEFO
Recurrent Expenditure	4,166.3	4,095.9	4,196.0
Development Expenditure	2,348.7	3,393.8	3,430.3
Reappropriation into Trust	172.5	0.0	0.0
Total Expenditure & Net Lending	6,687.5	7,489.7	7,626.3

Source: Department of Treasury

Total recurrent expenditure is estimated to be K4,196.0 million in 2010, K100.0 million higher than appropriated at Budget. This reflects an expected overspend on payments of personnel emoluments by National Departments and Provincial Governments of K145.0 million, partially offset by lower interest expenses.

Of the K145.0 million expected overspend in personnel emoluments, National Department recurrent expenditure is estimated to be K56.6 million higher than the 2010 Budget appropriation, and Provincial governments are estimated to be K88.5 million higher than the 2010 Budget appropriation.

The Department of Treasury has established a Payroll Project Team to investigate the causes of these overruns. It has also written to the heads of those agencies seeking their explanations of their overruns. A Payroll Monitoring Committee will be established within the Departments of Treasury, Finance and Personnel Management to monitor, control and manage all personnel emoluments related issues.

ABG and Transfers to statutory authorities are expected to be the same as appropriated at Budget.

Interest expense is estimated to be K422.1 million in 2010, K45.0 million lower than the 2010 Budget appropriation. The downward revision in interest payments is due to lower interest rates. The interest expense estimate has been prepared on the basis of a balanced budget in 2010.

Development expenditure in 2010 is estimated to be K3,430.3 million, K36.5 million higher than the 2010 Budget appropriation. This higher estimate is for payment of the remaining Business Development Grants related to the PNG LNG project.

Table 7: Development Expenditure 2009-2010 (Kina Millions)

	2009 Actual	2010 Budget	2010 MYEFO

Source: Department of Treasury

There is expected to be a Supplementary Budget to increase the 2010 appropriation to expend higher than expected revenue. This expenditure will be announced separately.

1.5 STATUS OF TRUST ACCOUNTS

A total of K5,183.1 million, up to and including the 2010 Budget, has been appropriated to trust accounts for implementation of priority expenditure programs.

The purpose of holding funds in trust is to spread spending over time to control inflationary pressures in the economy and to give time to agencies to properly plan project implementation.

The Table below (next page) shows the movements of funds for these trust accounts for the period 1 January – 31 May 2010.

Of the K5,183.1 million appropriated to Trust Accounts as at 31 May 2010, K4,319.3 million has been released by Department of Treasury into Trust Accounts, and K568.0 million relates to the 2010 Budget appropriations yet to be released into Trust Accounts. The remaining K295.8 million refers to appropriations (which relate to previous years) that have either been reallocated to other expenditures or lapsed.

The opening balance as at 1 January 2010 was K1,416.2 million. Deposits for the period 1 January – 31 May 2010 totaled K118.5 million. This comprised of K78.5 million of 2009 outstanding deposits plus K40 million inter-trust transfer from National Infrastructure Development Program to Transport Sector Infrastructure Rehabilitation. Expenditure incurred for the period 1 January – 31 May 2010 totaled K426.8 million, the closing balance of Supplementary Budget Trust Accounts at 31 May 2010 was K1,107.9 million.

Expenditure from trust accounts in 2010

Following is a summary of expenditure from Supplementary Budget Trust Accounts for the period 1 January – 31 May 2010:

- **K2.2 million was spent from the Agriculture Sector Development Program Trust Account.** No financial or project reporting has been provided by the implementing Agency, the Department of Agriculture & Livestock to Department of Finance during the period, therefore no details of expenditure is provided in this report.
- **K11.1 million was spent from the Education Sector Infrastructure Rehabilitation Trust Account** for infrastructure rehabilitation of schools around the country. Expenditure details for K10.9 million are shown in Appendix 1.
- **K3.7 million was spent from the Higher Education Sector Infrastructure Rehabilitation Trust Account.** No financial or project reporting has been provided by the implementing agency, the Office of Higher Education to Department of Finance during the period, therefore no details of expenditure is provided in this report.
- **K3.5 million was spent from the Law and Justice Sector Infrastructure Rehabilitation Trust Account.** Expenditure details are shown in Appendix 1.
- **K0.6 million was spent from the Strategic District Markets Trust Account.** Expenditure details for 0.5 million are shown in Appendix 1.

Source: Department of Finance

¹ The opening balance has been corrected from the figure reported in the 2009 Final Budget Outcome.

- **K19.5 million was spent from the Transport Sector Infrastructure Rehabilitation Trust Account.** The break-up of this expenditure is; District Roads K10.5 million, National Roads K8.1 million and Wewak Roads K0.9 million. Expenditure details are shown in Appendix 1.
- **K2.6 million was spent from the Resettlement of Volcano Victims Trust Account.** No financial or project report has been provided by the implementing agency, the East New Britain Provincial Administration to Department of Finance during the period, therefore no details of expenditure is provided in this report.
- **K0.7 million was spent from the Hospital & Health Care Rehabilitation Trust Account.** No financial or project reporting has been provided by the implementing agency, the Department of National Planning to the Department of Finance during the period, therefore no details of expenditure is provided in this report.
- **K5.9 million was spent from the Rehabilitation of Housing for Police Trust Account** for the rehabilitation of the Police Housing around the country. No financial or project reporting has been provided by the implementing agency, the Department of Police to the Department of Finance during the period, therefore no details of expenditure is provided in this report. Details shown in the Appendix 1 are from bank statements record received by the Department of Finance.
- **K16.1 million was spent from the Highlands Highway Rehabilitation Trust Account.** Expenditure details are shown in Appendix 1.
- **K195.2 million was spent from the District Service Improvement Program Trust Account.** No financial or project reporting has been provided by the 89 District Administrations or the ORD to the Department of Finance during the period, therefore no details of expenditure is provided in this report.
- **K6.1 million was spent from the Institutional Housing Pilot Trust Account.** Expenditure details for K6.0 million are shown in Appendix 1.
- **K0.1 million was spent from the Cooperative Societies Establishment Trust Account.** No financial or project reporting has been provided by the implementing agency, the Department of Commerce & Industry to the Department of Finance during the period, therefore no details of expenditure is provided in this report.
- **K5.2 million was spent from the Madang Marine Park Trust Account.** No financial or project reporting has been provided by the implementing agency, the Department of Commerce & Industry to the Department of Finance during the period, therefore no details of expenditure is provided in this report.
- **K19.0 million was spent from the Rural Electrification Trust Account.** No financial or project reporting has been provided by the implementing agency, the Department of Petroleum & Energy to the Department of Finance during the period, therefore no details of expenditure is provided in this report.
- **K121.9 million was spent from the National Infrastructure Development Program Trust Account.** Expenditures from this trust relates to the Government decision through the then Minister for Finance and Treasury to finance some important and critical commitments. Details of expenditure are shown in Appendix 1.

- **K3.5 million was spent from the Land Reform Trust Account.** No financial or project reporting has been provided by the implementing agency, Department of Lands to the Department of Finance during the period, therefore no details of expenditure is provided in this report.
- **K2.1 million was spent from the Regional Treasury and District Administration Offices Establishment Trust Account.** Expenditure details are shown in Appendix 1.
- **K1.0 million was spent from the Finance Commission of Inquiry Trust Account.** No financial or project reporting has been provided by the implementing agency, the Finance Commission of Inquiry Secretariat to Department of Finance during the period, therefore no details of expenditure is provided in this report.
- **K6.8 million was spent from the LNG Project Development Cost Trust Account.** No financial or project reporting has been provided by the implementing agency, the Department of Treasury to the Department of Finance during the period, therefore no details of expenditure can be provided in this report. *However outstanding details of expenditure not captured during 2009 Final Budget Outcome is shown in appendix 2.*
- During the period 1 January – 31 May 2010, the funds available in the following Trust Accounts have been exhausted and are now subject to revocation and subsequent closure of bank accounts;
 - PNG Gas Commercialization Equity Financing Trust Account
 - Agriculture Sector Development Program Trust Account
 - Kubalia High School Rehabilitation Trust Account
 - Law & Justice Sector Infrastructure Rehabilitation Trust Account
 - Outstanding PBSS (Police) Trust Account
 - NBC Infrastructure Rehabilitation Trust Account
 - Highlands Highway Rehabilitation Trust Account
 - Housing Development Pilot Trust Account
 - Urbanization Pilots Trust Account
 - Cooperative Societies Establishment Trust Account
 - National Border Authority Trust Account
 - Petroleum Outstanding MOA Commitments Trust Account
 - National Stadium Trust Account, and
 - Oro Restoration Authority Trust Account.
- During the period 1 January – 31 May 2010, the following Trust Accounts were established and are awaiting funds appropriated in the 2010 Budget to be paid into:
 - Waigani Office Development Project Trust Account
 - Business Development Grants Trust Account
 - Infrastructure Development Grants Trust Account
 - Coastal Vessels Program Trust Account
 - Fisheries Development Project Trust Account

Further details of expenditure from Supplementary Budget Trust Accounts are provided in Appendix 1. In terms of the 2009 detailed expenditure report, most implementing agencies have not provided their expenditure report except Department of Commerce and Industry, Department of Works, Civil Aviation, DPM, Department of Police and Department of Treasury.

1.6 FINANCING

The budget surplus is expected to be K533.3 million in 2010, compared with the original estimate of a balanced budget, which means that K533.3 million of public debt could be expected to be retired without a Supplementary Budget. Thus the debt outstanding is projected to be K6,410.8 million or 24.9 per cent of GDP at the end of 2010. In the likely case that a Supplementary Budget is passed, the Budget is expected to be balanced with total public debt outstanding estimated to be around K6,948.4 million or 27 per cent of GDP.

1.7 PUBLIC DEBT

Total public debt outstanding is expected to be K6,410.8 million or 24.9 per cent of GDP at the end of 2010 compared to the original budget estimate of K7,149.6 million or 28.7 per cent of GDP. This reduction in debt reflects:

- a lower level of debt at the end of 2009 compared to the 2010 budget projection due to smaller than anticipated exchange rate losses and a smaller budget deficit; and
- the expected surplus in 2010.

Table 9: Public Debt (Kina Millions)

	2009 Outcome	2010 Budget	2010 MYEFO
Domestic	4,155.9	4,127.9	3540.2

1.8 RISKS TO THE MID YEAR ECONOMIC AND FISCAL OUTLOOK

The forward estimates of revenues and expenditure in this report incorporate assumptions and judgments based on information available at the time of publication.

Although the economic and fiscal outlook is generally positive, there are a number of risks that may alter the forecast presented in this update. With the global recession of 2009 still lingering on confidence and with significant uncertainty in the commodity markets, commodity prices and revenue projections could vary significantly from current projections. The volatility of the world economy from negative economic news and events were most clearly observed when concerns were raised as to the ability of certain European countries to meet their sovereign debt obligations. This subsequently resulted in a sharp retreat in equity and commodity prices. Although the market has recovered somewhat from this, any further negative economic news could trigger a more prolonged weakness of confidence and markets.

PNG's largest resource project - the PNG LNG project has now commenced construction work and economy activity is anticipated to pick up across all sectors. Any unexpected interruption in this project would have very significant economic implications. The possibility of the domestic political situation becoming more uncertain also represents a risk to business confidence.

Expenditure forecasts could vary if there are underspends, new appropriations, changes to appropriations and the realization of certain contingent liabilities. More generally, the economic outlook assumes that the MTFs and DSP targets are adhered to. Loss of control of aggregate expenditure, or lack of progress on key public expenditure reform programs, would place at risk the macroeconomic stability on which the improved economic outlook has been built.

For all of the above reasons, some degree of uncertainty is attached to the estimates of both revenue and expenses in 2010. While the MYEFO estimates are prepared with the benefit of knowing some revenue and expenditure outcomes for the early months of the budget year, which tend to reduce forecast errors, substantial uncertainties nevertheless remain.

1.9 2010 AND BEYOND

The revised economic and fiscal forecasts for 2010 and the commodity price assumptions that underlie them will impact on 2010 and beyond. Economic and fiscal projections for the period 2010 to 2015 will be updated in 2011 Budget. These projections will incorporate updated forecasts and decisions taken by the Government concerning the 2011 Budget Strategy Paper.

PART 2

MID YEAR EXPENDITURE ESTIMATES BY AGENCY

2.1 FUNDED EXPENDITURE SINCE THE 2010 BUDGET

The following recurrent expenditure decisions have been taken by the Government since the 2010 Budget:

Table 10: Funded Recurrent Expenditure Decisions since the 2010 Budget (Kina Millions)

AGENCY	2010 MYEFO
Funded New Recurrent Expenditure	
Joint operation by Police and Correctional Services Institute (CIS)	3.0
PNG Govt. contributions for Disaster assistance to Niue, Tonga, A/Samoa and Wellington City Missions.	3.2
State Visit by Indonesia's President	1.5
Investigation into prison breakout	0.2
Emerging Pacific Leaders dialogue 2010	0.1
To cater for legal fee for Jerewai Lawyers as per NEC Decision	2.0
TOTAL NEW RECURRENT EXPENDITURE	10.0
Secretary's Advance	-10.0
Total	0.0

2.2 2010 BUDGET EXECUTION

The issuance of warrants by the Department of Treasury impacts the rate and timing of expenditure by agencies. In managing the issuance of warrants, Treasury must balance the management of the Government's overall cash requirement with the requirement of agencies for cash to deliver their authorized programs.

As of 31 May 2010, a total of **K5,501.8** million of warrants have been issued from both the recurrent and the development budget. This represents 57 per cent of the recurrent and development appropriations of **K9,637.7** million for 2010.

Recurrent Budget

Recurrent budget warrants released to end of May 31, 2010 totaled **K4,249.1** million. This is made up of **K461.0** million for national departments Personnel Emoluments (PE), **K756.1** million for national departments Goods and Services (G&S), **K122.1** million for grant transfers to statutory authorities, **K295.8** million for provincial grants including G&S and staffing grants and **K2,614.0** million for debt servicing. Excluding debt servicing, a total of **K1,635.0** million warrants have been issued up to 31 May 2010 from the full year recurrent appropriations. This represents 45 per cent of the total non-debt servicing appropriation for 2010.

To 31 May 2010, expenditure incurred for the recurrent budget, excluding debt servicing, was **K1,484.8** million, which was 91 per cent of the warrant released and 40.9 per cent of the appropriation of **K3,632.8** million.

Expenditure incurred for national departments' PE was **K437.6** million, which was 95 per cent of the warrant released and 41 per cent of the appropriation. Expenditure incurred for national departments' G&S was **K541.0** million, which was 72 per cent of the warrant released and 41 per cent of the appropriation

A further **K122.7** million was incurred as expenditure for the statutory authorities. This was 100 per cent of the warrants released and 45 per cent of the appropriation.

For the provincial grants, a total of **K383.6** million was spent. This was 130 per cent of the warrants released and 39 per cent of the appropriation. Expenditure exceed warrants released to date because expenditure in PE for the provinces continued to occur despite late submission and approval of budgets and release of warrants.

For debt servicing the full warrants of **K2,614.0** million were issued and expenditure to end of May was **K488.2** million. This was 19 per cent of the appropriation.

Broadly speaking, recurrent expenditure is in line with annual appropriation limits, however, Treasury will continue to manage warrant release and monitor PE expenditure especially to help agency heads ensure they do not overspend their appropriation, as many did in 2009.

Development Budget

The development budget warrants total **K1,252.7** million. This is made up of **K1,030.0** million for national departments, **K180.6** million for statutory authorities, and **K42.1** million for provincial projects.

To 31 May 2010, expenditure incurred for the entire development budget, cash and non cash components, was **K607.5** million, which was just 18 per cent of the appropriation of **K3,390.8** million.

Expenditure for the national departments cash component was **K443.0** million, which was 43 per cent of the warrant released and 33 per cent of the appropriation.

A further **K86.2** million was incurred as expenditure for the statutory authorities. This was 48 per cent for the warrants released and 32 per cent of the cash appropriation.

For the provincial projects, a total of **K37.3** million was incurred. This was 89 per cent for the warrants released and 23 per cent of the cash appropriation. Tables below on pages 29 – 34 provide the amounts of warrants issued to agencies up to 31 May 2010.

SUMMARY OF NATIONAL BUDGET EXPENDITURE MYEFO 2010

³ Total expenditure up to 31 May 2010 for provinces in the recurrent and development expenditure tables includes ABG, however this is separated in Table 2 of the Fiscal Outturn Tables (page 26). Variance between these two totals is due to the timing of when the expenditure reports were sourced from the Treasury Monitoring System (TMS) and the Programming Budgeting System (PBS).

2.3 REALLOCATION OF APPROPRIATED FUNDS

Sections 3 and 4 of the annual appropriation acts provide that, in certain circumstances, there may be a reallocation of funds appropriated to agencies at the discretion of the Secretary of the Treasury.

In practice, this discretion allows unexpended appropriation to be reallocated through the Secretary's Advance to meet the cost of unbudgeted expenditure that is urgent, unavoidable and unforeseen, up to the limit of the Secretary's Advance (Section 3 transfers), or reallocated between services subject to an overall limit of 10 per cent of the total appropriation for recurrent expenditure (Section 4 transfers).

To 31 May 2010, **K229.4** million has been reallocated through these mechanisms. These constitute approximately 3 per cent of the total appropriation. **K210.1** million relates to transfers between items within the total appropriation for an agency. A further **K 19.3 million** has been allocated through the Secretary's Advance (further details of these payments are in Table 21 below).

DETAILS OF EXPENDITURE FROM SECRETARY'S ADVANCE

An amount of K20.0 million was appropriated to Secretary's Advance in the 2010 Budget. The following table sets out the allocations made from the Secretary's Advance from 1 January 2010 up to 31 May 2010.

Table 11: Expenditure from Secretary's Advance

Division		2010 Budget K'000	2010 MYEFO K'000
207	Original Appropriation	20,000.0	
	Total Funds Available From Secretary's Advance	20,000.0	
207	To cater for HIES expenditures as per Dep Sec (Policy) direction.		500.0
226/228	Joint operation by Police and Correctional Services Institute (CIS)		3,000.0
