**PIP NUMBER:** 2731

**PROJECT NAME:** NATIONAL ROAD ACCIDENT DATABASE SYSTEM

**EXECUTING AGENCY:** National Roads Safety Council

**PROJECT OBJECTIVIES:**

To establish a fully operational National Road Accident Database to permit the scale, nature and characteristics of an accident to be properly defined so that appropriate measures can be delivered by relevant agencies to reduce the number of deaths on PNG roads.

**PROJECT STATUS:**

Ongoing project to be established across PNG. establishment of Road Accident Database to determine blackspot areas in order to advise government to change its design and construction concepts of roads.

**PROJECT COMPONENTS:**

The components of this project will include (1) Accident Reporting and Recording System, (2) Storage and Retrieval System and (3) Analysis and Dissemination System.

**PROJECT JUSTIFICATION:**

The old road accident database system crashed in the late 1990s and has never been replaced due to insufficient funding internally. Currently, most of the accident data is collected manually from the police and has encountered problems of inaccurate data. This project aims to eliminate this problem.

**PROJECT CAPACITY:**

The NRSC has the capacity to implement this project however, the installation of the data system will be outsourced to professional agencies to build.

**PROJECT BENEFICIARIES:**

Information gathered from this database will benefit the road designer to avoid potential risk areas in terms of road design and the State in the revenue loss that it makes annually from the medical expenses. The project will also benefit all road users from black spots that this data will provide to the general public through information dissemination.

**PROJECT SUSTAINABILITY**

The NRSC will sustain this project from its annual recurrent budget.
